## TECHNICAL SKILLS

|                 |             |                                 |
|-----------------|-------------|---------------------------------|
| Solidity        | Python      | Linux Windows . WSL             |
| Foundry         | Go (Golang) | Docker                          |
| DEX integration | Node.js     | Azure Amazon Managed Blockchain |
| Oracle Networks | Bash        | Git & Version Control           |
| Token Standards |             |                                 |

## PROFESSIONAL SKILLS

|                         |                   |                 |
|-------------------------|-------------------|-----------------|
| Effective Communication | Critical Thinking | Problem Solving |
|-------------------------|-------------------|-----------------|

## WORK EXPERIENCE

**Uniswap Hook Incubator Cohort 10**  
Atrium Academy  
*Achievements/Task*

APR 2026 – Present

- Built smart contract automations using Uniswap Hooks / v4 architecture.
- Deploy high impact hooks with Onchain experience.

**Blockchain Developer**  
LACCEI  
*Achievements/Task*

FEB 2025 – DEC 2025

- Deployed Hyperledger network on AWS serving 500+ academic users, reducing certificate issuance costs from \$10+ to a fixed \$5/cert.
- Developed and tested Solidity smart contracts for Ethereum-compatible environments.
- Built decentralized solutions tailored for academic and organizational use cases.

**Opensource Systems developer and research Assistant**  
Pedagogical and Technological University of Colombia  
*Achievements/Task*

MAR 2024 – AUG 2024

- Supported software development for open-source infrastructure projects.
- Contributed to backend systems and object-oriented programming initiatives.
- Assisted research and technical implementation for university innovation programs.

## EDUCATION

**Systems and Software Engineering**  
Pedagogical and Technological University of Colombia  
*Achievements/Task*

JUN 2021 – Expected JUN 2026

- Researcher of Telematics and ICT Systems Group, Contributor to Cybersecurity Research Initiatives.
- Researcher of GIMI Research Group (Information Management & Databases), focused on BlockChain.

**Systems and Software Engineering**  
Private University of Tacna  
*Achievements/Task*

FEB 2025 – DEC 2025

- Selected for international academic exchange based on high academic performance.
- Active member of Libre UPT open-source community (Linux and free software).
- Represented the university in technology competitions, earning award recognition twice.
